Contact No: +91-8979418480

Location: Dehradun, Uttarakhand, India

Professional Summary

MBA (AI & Data Science) student with hands-on experience in Python, Machine Learning, Data Engineering, and AI Automation. Skilled in building ML models, ETL pipelines, and workflow automations using n8n, SQL, PySpark, AWS, and Databricks. Proficient in data visualisation, Git, and Jupyter Notebook. Seeking opportunities in Data Science, Data Analytics, Machine Learning Engineering, or AI Automation.

Academic Record

MBA – AI & Data Science	2025–27	Graphic Era University, Dehradun
BCA – Computer Science	2022–25	Graphic Era Hill University, Dehradun
Class XII, C.B.S.E	2022	Country Wide Public School
Class X, C.B.S.E	2020	St Adam's Public School
Certifications	AWS Cloud Practitioner Essentials AWS Cloud Quest: Cloud Practitioner Fundamentals of AI & ML (<i>all via AWS Training & Certification</i>) Machine Learning Certification – Tutedude Cloud Computing Certification – Tutedude SQL Certification – Tutedude	

Summer Internship Project

Amdox Technologies	NeuralRetail — AI-Powered Retail Analytics Platform	14 June - 14 Aug 2026
SIP Topic	Built an end-to-end AI retail analytics platform delivering customer churn prediction, segmentation, demand forecasting, and inventory optimisation via a live dashboard and REST API.	
Key contribution with measurable Outcomes	- Engineered 4 ML models on 500,000+ transactions — segmentation (Silhouette 0.5751), churn prediction (AUC 0.8081, flags 80) - Deployed 8-endpoint FastAPI backend + 6-page Streamlit dashboard on 2 cloud platforms at 0 cost.	
Learning	- Developed practical understanding of the end-to-end ML lifecycle — data cleaning, feature engineering, model development, API design, and cloud deployment using Python, XGBoost, LightGBM, FastAPI, and Streamlit. - Gained hands-on experience in correcting data leakage via temporal splits, applying EOQ + ABC-XYZ inventory frameworks, and translating ML results into measurable business outcomes.	

Projects

AI-Powered Resume Screening & HR Automation System		Ongoing
Project Topic	Built an end-to-end HR automation pipeline using n8n, Agentic AI, Gemini API, Google Drive, Google Calendar, Gmail, Slack, and PDF Extraction.	
Learnings	- Reduced manual screening effort by 70%; evaluated and scored 50+ resumes automatically using Gemini API. - Implemented conditional routing for interview scheduling, email dispatch, and real-time Slack alerts.	

AI-Powered Restaurant Automation System Completed	
Project Topic	Engineered an AI-driven order management system using n8n, LLM Agents, OpenAI/Gemini, Google Sheets, and Prompt Engineering.
Learnings	- Handled end-to-end restaurant order workflows with zero manual intervention. - Designed modular agentic tools (<code>menu_tool</code>, <code>order_tool</code>); improved response consistency by 60% using memory-based conversational flows.

End-to-End Data Pipeline & Analytics Platform Completed	
Project Topic	Built a production-grade data lakehouse using Databricks, PySpark, Delta Lake, Medallion Architecture (Bronze, Silver, Gold), SQL, and Data Warehousing.
Learnings	- Gained expertise in Medallion Architecture and large-scale data processing with PySpark and Delta Lake. - Created optimised fact and dimension tables, reducing query time by 40%.

House Price Prediction Web App Completed	
Project Topic	Developed a Ridge Regression model for house price prediction using Python, Scikit-learn, Flask, HTML, and Feature Engineering; deployed as a web app.
Learnings	- Achieved low RMSE through feature engineering and hyperparameter tuning. - Learnt end-to-end ML deployment: model training, Flask API, and responsive HTML front-end.

SMS Spam Detection System Completed	
Project Topic	Built an SVM-based text classifier for spam detection using Python, Scikit-learn, TF-IDF vectorisation, NLP, and Text Classification.
Learnings	- Applied TF-IDF and text preprocessing pipelines; achieved over 95% classification accuracy on the test set. - Developed understanding of NLP workflows and model evaluation techniques.

Achievements & Positions of Responsibility	
Sports Coordinator, Graphic Era University (2025–Present): Managed and coordinated university-level sports events and tournaments for 200+ students; oversaw scheduling, logistics, and team coordination. Uttarakhand Khel Mahotsav 2020: Secured Gold in Badminton Doubles. University Badminton Team Representative (2022–2025): Represented the university in inter-college badminton competitions; demonstrated teamwork, leadership, and consistent performance.	

Key Skills		
Technical Skills	AI & Data Skills	Soft Skills
Python (Pandas, NumPy, Scikit-learn, Matplotlib) SQL, PySpark AWS (S3, EC2) Git & GitHub MySQL, PostgreSQL, Snowflake	Machine Learning / NLP n8n, Agentic Workflows LLM Integration (Gemini, OpenAI) ETL, Delta Lake, Medallion Architecture Power BI, Databricks	Leadership Teamwork Communication Problem Solving Adaptability Critical Thinking
