Location: Dehradun, Uttarakhand, India

PROFESSIONAL SUMMARY

- MBA (AI & Data Science) student with hands-on experience in Python, Machine Learning, Data Engineering, and AI Automation. Skilled in building ML models, ETL pipelines, and workflow automations using n8n, SQL, PySpark, AWS, and Databricks. Proficient in data visualization, Git, and Jupyter Notebook. Seeking opportunities in Data Science, Data Analytics, Machine Learning Engineering, or AI Automation.

EDUCATION

- **MBA – Artificial Intelligence and Data Science** Jul 2025 – Jul 2027
Graphic Era University, Dehradun
- **BCA – Computer Science** Aug 2022 – Jun 2025
Graphic Era Hill University, Dehradun
- **Class XII, C.B.S.E** 2022
Country Wide Public School
- **Class X, C.B.S.E** 2020
St Adam's Public School

CERTIFICATIONS

- **AWS Cloud Practitioner Essentials** – AWS Training & Certification
- **AWS Cloud Quest: Cloud Practitioner** – AWS Training & Certification
- **Developing Machine Learning Solutions** – AWS Training & Certification
- **Fundamentals of AI & ML** – AWS Training & Certification
- **SQL Certification** – Tutedude

PROJECTS

- **AI-Powered Resume Screening & HR Automation System** (Ongoing)
Technologies: n8n, Agentic AI, Gemini API, Google Drive, Google Calendar, Gmail, Slack, PDF Extraction
 - Architected an end-to-end HR automation pipeline using n8n workflows, reducing manual screening effort by an estimated 70%.
 - Integrated Google Drive, PDF text extraction, and Gemini API to evaluate and score 50+ candidate resumes automatically.
 - Designed conditional routing logic to auto-schedule interviews via Google Calendar, dispatch short-list/rejection emails via Gmail, and push real-time HR alerts to Slack; implemented async wait-node for multi-step coordination.
- **AI-Powered Restaurant Automation System** (Ongoing)
Technologies: n8n, LLM Agents, OpenAI/Gemini, Google Sheets, Prompt Engineering
 - Engineered an AI-driven order management system using n8n and LLM agents, handling end-to-end restaurant order workflows with zero manual intervention.
 - Designed modular agentic tools (menu_tool, order_tool) backed by Google Sheets, and implemented memory-based conversational flows with retry handling, improving response consistency by an estimated 60%.
- **End-to-End Data Pipeline & Analytics Platform** (Ongoing)
Technologies: Databricks, PySpark, Delta Lake, Medallion Architecture, SQL, Data Warehousing

- Developed a production-grade data lakehouse pipeline using Medallion Architecture (Bronze, Silver, Gold) on Databricks, processing structured and semi-structured datasets.
- Built and optimized ETL pipelines using PySpark and Delta Lake; created fact and dimension tables reducing query time by an estimated 40%.

- **House Price Prediction Web App**

Technologies: Python, Scikit-learn, Ridge Regression, Flask, HTML, Feature Engineering

- Trained and evaluated a Ridge Regression model for house price prediction, achieving low RMSE through feature engineering and hyperparameter tuning; deployed via Flask with a responsive HTML interface.

- **SMS Spam Detection System**

Technologies: Python, Scikit-learn, SVM, TF-IDF, NLP, Text Classification

- Built and evaluated an SVM-based text classifier for spam detection; applied TF-IDF vectorization and text preprocessing, achieving over 95% classification accuracy on the test set.

TECHNICAL SKILLS

- **Programming Languages:** Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SQL, PySpark
- **AI & Automation:** n8n, Agentic Workflows, LLM Integration (Gemini, OpenAI), Prompt Engineering, Retrieval-Augmented Generation (RAG), Jupyter Notebook
- **Machine Learning:** Supervised Learning, Classification, Regression, Model Evaluation, Cross-Validation, Feature Engineering, SVM, Ridge Regression, TF-IDF, NLP
- **Data Engineering:** ETL Pipelines, PySpark, Delta Lake, Medallion Architecture, Databricks, Snowflake, Data Warehousing, Apache Spark, Hadoop, Big Data
- **Cloud & DevOps:** AWS (S3, EC2, SageMaker Basics), Git, GitHub, Version Control
- **Data Visualization & BI:** Matplotlib, Seaborn, Power BI, Databricks
- **Databases:** MySQL, PostgreSQL, Snowflake, Google Sheets
- **Soft Skills:** Communication, Teamwork, Leadership, Adaptability, Problem Solving, Critical Thinking

POSITIONS OF RESPONSIBILITY

- **Sports Coordinator, Graphic Era University** *2025 – Present*
Managed and coordinated university-level sports events and tournaments for 200+ students; oversaw scheduling, logistics, and team coordination.
- **University Badminton Team Representative** *2022 – 2025*
Represented the university in inter-college badminton competitions; demonstrated teamwork, leadership, and consistent performance.
